

Dhruva Kirankumar Halappa

Software Engineer

[Portfolio](#) | dhruvakh2006@gmail.com | [LinkedIn](#)

SUMMARY

Computer Science Engineering student with a strong foundation in Artificial Intelligence, Machine Learning, full-stack development, and problem-solving. Skilled in Python, JavaScript, React, and modern web technologies, with hands-on experience building AI-powered applications and software projects. Passionate about developing practical, user-focused solutions and applying emerging technologies to solve real-world problems.

SKILLS

Programming Languages: Python, Java, JavaScript, C, C++

AI/ML: Machine Learning, Generative AI, Data Analysis

Web Development: React.js, Node.js, HTML, CSS

Databases: MySQL, MongoDB

Developer Tools: Git, GitHub, VS Code, Vite

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Trainee — Samsung Innovation Campus

- Coding and Programming — working with Python and Generative AI.

Technical Co-Lead — OsCode, KLEIT Chapter

- Led technical initiatives and supported students in programming, development, and technical activities.
- Contributed to organizing technical events, workshops, and collaborative coding activities.

Public Relations Coordinator — IEEE AESS, KLEIT Chapter

- Managed communication and promotional activities for chapter events and initiatives.
- Coordinated with members and teams to improve event outreach and participation.

Placement Coordinator — KLEIT

- Coordinated placement-related communication between students, coordinators, and recruiters.
- Assisted in organizing placement activities and facilitating communication during recruitment processes.

PROJECTS

MediMate — AI-Powered Healthcare Platform

React.js, JavaScript, AI/ML, APIs

- Developed an AI-powered healthcare platform focused on providing accessible and personalized healthcare support.
- Built a responsive and user-friendly interface with AI-driven features and interactive healthcare workflows.

AdaptiCode — AI-Powered Coding & Learning Platform

React.js, JavaScript, AI, APIs

- Developed an AI-powered learning platform designed to help students practice programming and improve problem-solving skills.
- Implemented interactive coding, personalized learning, feedback, and progress-tracking features.

Obstacle Avoidance Robot

Arduino, C/C++, Ultrasonic Sensors, Embedded Systems

- Built an autonomous robot capable of detecting obstacles using ultrasonic sensors and dynamically changing its path to avoid collisions.
- Integrated sensors, motors, and control logic to achieve real-time obstacle detection and navigation.
- Secured 2nd Prize at the KLEIT Techie Show project exhibition, KLE Institute of Technology.

Hotel Management System

Python

- A pure Python project.
- Built a hotel management system to handle bookings, rooms, and related operations through a structured software solution.

AWARDS & CERTIFICATIONS

- ISRO Bharatiya Antariksh Hackathon (BAH) 2026 — Certificate of Participation for a successful idea submission.
- Smart India Hackathon (SIH) 2025 — Qualified for the National Round.
- VIBE-A-THON 2025 — Secured 1st Place with team Code Loom, an 8-hour hackathon organized by IEEE Computer Society in collaboration with OSCode.
- KLEIT Techie Show — Secured 2nd Prize for the C++ Traffic Light Simulation project exhibition, KLE Institute of Technology.
- Active hackathon participant — many more hackathons, courses, and summits on LinkedIn and portfolio.

EDUCATION

Computer Science and Engineering

KLE Institute of Technology, Hubballi

2024 – 2028
