SUMMARY

I am a Computer Science and Engineering student with a strong interest in software development, problem-solving, and building real-world technology solutions. I am passionate about transforming ideas into scalable applications and continuously exploring new tools and frameworks that enhance user experience and system performance.

My technical skill set includes programming languages such as C/C++, Python, and JavaScript, along with web development technologies like HTML, CSS, React, and Node.js. I also have experience working with databases, version control systems like Git, and development tools that support efficient and collaborative software engineering.

Beyond academics, I actively contribute to technical communities and leadership initiatives, where I collaborate with peers, organize tech events, and promote innovation-driven learning. These experiences have strengthened my communication, teamwork, and project management abilities.

I am particularly interested in opportunities related to Software Development, Web Development, and emerging technology domains where I can apply my skills, learn from industry professionals, and contribute meaningfully to impactful projects.

I am always open to connecting with like-minded professionals, recruiters, and collaborators to discuss technology, innovation, and career opportunities.

EXPERIENCE

Public Relations Coordinator

IEEE AESS STUDENT BRANCH KLEIT

2026 - Present

As the Public Relations Coordinator, I contribute to the planning and execution of technical and non-technical events, ensuring smooth coordination between organizing teams, faculty, and participants. I handle event promotions, manage communications, support technical workshops and seminars, and assist in documentation and reporting. My role focuses on strengthening branch visibility, increasing student engagement, building collaborations, and maintaining a professional image of the organization both within and outside the campus.

Technical Co-Lead

OsCode KLEIT

2025 - Present

As the Technical Co-Lead at OSCode, I assist in planning and executing technical events, coding sessions, and workshops focused on programming and emerging technologies. I collaborate with the core team to design event structures, mentor participants, and ensure smooth technical execution. My responsibilities include guiding students in problem-solving, supporting project development initiatives, coordinating with speakers and trainers, and fostering a collaborative learning environment that promotes technical growth and innovation within the campus.

Placement Coordinator

KLEIT

2025 - Present

As a Student Placement Coordinator, I act as a liaison between students, the placement cell, and recruiting companies to ensure smooth execution of recruitment drives. I coordinate pre-placement activities, manage communication regarding job opportunities, assist in organizing campus interviews and technical assessments, and guide students through the placement process. My role involves maintaining placement data, supporting corporate interactions, and contributing to effective planning and execution of placement activities to enhance student career opportunities.
